

**PT-MD(Metal Deactivator)**

**PT-GAS-PDA (Antioxidant)**

PT-MD metal deactivator can be used to inhibit the gum and sediment formation by the catalytic effect of dissolved metal ions, particularly  $\text{Cu}^{++}$  ions present at very low (parts per billion) levels in some gasoline. In such cases, a small amount of PT-MD Deactivator will greatly enhance the performance of the antioxidants used.
