

### Lubricity Additive

For Diesel and Jet Kerosene Fuels

#### **PT-PCI**

PT-PCI provides both corrosion inhibition and lubricity enhancement to jet kerosene and other finished fuel blends. PT-PCI can be used to provide critical lubricity enhancement in low sulphur diesel and kerosene fuels. It is included in the qualified product list, QPL-25017, for use in JP-4, and other fuels designated by Military Specification MIL-I-25017. It is approved by NATO and IATA as an aviation turbine lubricity enhancement additive.
